

DESCRIPTION

Additive that minimises smoke levels of diesel vehicles with or without catalytic converter/particulate filter

FEATURES

It keeps the combustion system clean, avoiding the formation of deposits in the injectors and therefore extending their life. By keeping the injector ducts clean, the fuel is sprayed correctly, improving combustion and saving diesel consumption, resulting in a reduction in pollutant emissions and therefore minimising smoke. It allows a more complete combustion of the fuel, minimising smoke levels. Antioxidant, detergent and corrosion inhibitor product. Totally soluble in any type of diesel or gas oil. Can be used as an additive for biodiesel fuels up to B30. Valid for diesel engines with or without smoke after-treatment elements (particulate filters, catalytic converters)..

APPLICATIONS

On all types of diesel-powered vehicles.

HOW TO USE IT

Add the contents of the 300cc container into the fuel tank when it is full. Treatment for 30 - 50 litres of diesel.

TECHNICAL DATA

Aspect :	Visual	Transparent and bright fluid
Color :	Visual	Pale yellow
Density at 20°C :	UNE 26-389	0.810 / 0.820 gr/cc.
