DEXRON VI

ED-04
NOV-14

DESCRIPTION:

100% synthetic automatic transmission and power steering lubricant for vehicles requiring GM Dexron VI compliance.
This is the latest and newest General Motors specification for automatic transmissions.

FEATURES:

- High viscosity index and excellent viscosity stability in service.
- Extended oil changes; longer service life.
- Excellent shear stability (oil holds its viscosity better for longer).
- Applications where low viscosity and fuel economy are required.
- Due to its high quality formulation, protection against wear and corrosion of the system extending the life of the mechanism. Protects transmission gears allowing smooth and shock-free operation of the transmission.
- High resistance to oil ageing and low sludge formation.
- High thermal and film stability; even at high operating temperatures.
- Excellent low temperature behaviour; important feature at vehicle start-up and in cold climates.
- Fully compatible with rubber seals. High resistance to foaming.
- Meets the requirements of new and old General Motors transmissions.

HOW TO USE IT:

Automatic transmissions, power steering, power steering for cars, trucks, public works and agricultural machinery. This fluid meets the latest requirements of the General Motors Dexron VI standard. It can be used for older vehicles where Dexron II or Dexron III quality level is required.

TECHNICAL DATA:

Description :	Lubricant for automatic transmissions	
Color:	Visual	Red
Viscosity at - 40°C :	ASTM D-445	32 cSt maximum
Viscosity at 100°C :	ASTM D-445	5.7 - 6.4 cSt
Viscosity index :	ASTM D-2270	145 minimum

We reserve the right to modify the general characteristics of our products in order to facilitate that our clients benefit from the latest technical advances. For more information about the product, it is recommended to consult the Safety Data Sheet (SDS), available through the Customer Service Center in IADA.
