

DESCRIPTION:

Lubricating grease based on mineral oil and lithium soap, with extreme pressure additives (molybdenum disulphide), anti-corrosion, anti-rust, anti-oxidants, specially designed for high-performance friction.

FEATURES:

- Improves lubrication at high temperatures, heavy loads and increases anti-wear properties.
- Very good resistance to mechanical work.
- Water resistant.
- Corrosion resistant.
- Resistant to very high loads.
- High anti-wear properties.
- Chemical stability.
- Resistant to oxidation.

APPLICATIONS:

Specially formulated for the lubrication of bearings rotating at medium to medium-low speeds and all types of mechanisms subjected to high temperatures and loads. Especially for electric brakes, bushings and heavy machinery.e

HOW TO USE IT:

Direct use on the elements to grease.

TECHNICAL DATA:

Aspect:	Black/Greyish grease
NLGI:	GRADE 2
Base soap:	Lithium
Penetration at 25°C	265/295
Drop point:	180°C minimum
Working range:	-20°C to + 120°C
