

DESCRIPTION

Complete pre-treatment for petrol fuel system. Reduces gas emissions, black smoke emission, etc. Product of great help for the passage through the ITV by gas emission.

FEATURES

New generation additive that quickly cleans and lubricates the petrol fuel circuit. Improves engine performance. Drastically reduces exhaust emissions. Cleans and protects the entire fuel system. Corrosion and rust control. Does not harm catalytic converters. Increases lubricating effect in low sulphur fuels.

HOW TO USE IT

Shock Treatment: When entering the reserve, we would apply the product in the fuel tank and then about 5 litres of fuel, thus achieving a very intensive cleaning. After application, drive the vehicle at high speed for 20-30 minutes to achieve a good result, although the product will continue to act for much longer. For maintenance cleaning, 1 dose of product is recommended every 8-10 full tanks.

TECHNICAL DATA

Aspect :	Visual	Transparent and bright fluid
Color :	Visual	Yellow
Density at 20°C :	UNE 26-389	0.790 / 0.820 gr/cc.
